Analyst Commentary

The current rent roll indicates a weighted average in-place rent approximately 6.9% below current achievable market rent based on recent leases and competing multifamily assets. Lease rollover is front-loaded into the next six months, creating a near-term revenue management opportunity if turnover remains manageable.

Three units are temporarily offline pending flooring replacement and minor paint work. Concessions are not material at present. Collection loss has averaged below 1.0% over the trailing twelve months.
