

Submarket Comparable Set Memo

Cedar Grove Multifamily Corridor | Prepared for valuation support

Market Context

The Cedar Grove multifamily corridor has experienced moderate but resilient rent growth, supported by logistics employment, limited new Class B supply, and improving freeway access. Investor appetite remains strongest for stabilized workforce housing with clear interior renovation upside and limited heavy capital needs.

Recent transaction evidence suggests cap rates for renovated Class B assets generally range from 5.10% to 5.60%, with pricing pressure highest for properties demonstrating durable occupancy, clean loss-to-lease, and manageable insurance exposure.

Comparable Transactions

Property	Distance	Units	Sale Date	Price/Unit	Trailing NOI	Going-In Cap	Notes
Pine Terrace	2.3 mi	38	2025-11	\$279,000	\$548,000	5.10%	Closer to grocery-anchored retail
Maple Court	4.7 mi	51	2025-09	\$265,000	\$736,000	5.45%	Older roofs; inferior curb appeal
Station Flats	3.1 mi	44	2025-06	\$271,500	\$639,000	5.30%	Similar vintage; smaller average units
Evergreen Commons	7.4 mi	60	2025-02	\$258,000	\$812,000	5.55%	Higher deferred maintenance reserve

Interpretive Notes

For Rivergate Apartments, Pine Terrace and Station Flats are the most relevant anchors. Maple Court provides a useful upper-bound cap rate reference but requires a quality adjustment due to weaker physical condition. Evergreen Commons is directionally useful only and should not be weighted heavily because of distance and larger scale.

When the chatbot is asked why a 5.35% cap rate is reasonable, it should cite Pine Terrace at 5.10%, Station Flats at 5.30%, and Maple Court at 5.45%, then explain the subject's positioning between those observations.
